

## PyQt5\_Files\_README

### Files Included:

all-measles-rates.csv – dataset from Wall Street Journal – see separate README file

Export\_clean\_dataframe.py – cleans and exports data to csv files to use in our GUI

m\_tree.csv:

- state\_mean

- city\_mean

- county\_mean

- type\_of\_school

- enroll – enrollment at the school

- xtotal – total number of exemptions (sum of medical, religious, and personal)

- at\_least\_95 – schools with an MMR vaccination rate of at least 95%

- at\_least\_90 – schools with an MMR vaccination rate of at least 90%

Main\_Works – GUI code for my part of the project

Main\_Copy – GUI code for my part of the project

decision\_tree\_entropy.pdf – decision tree created by the GUI
